

ZACK KASS

The Next Renaissance

ZACK KASS | FUTURIST

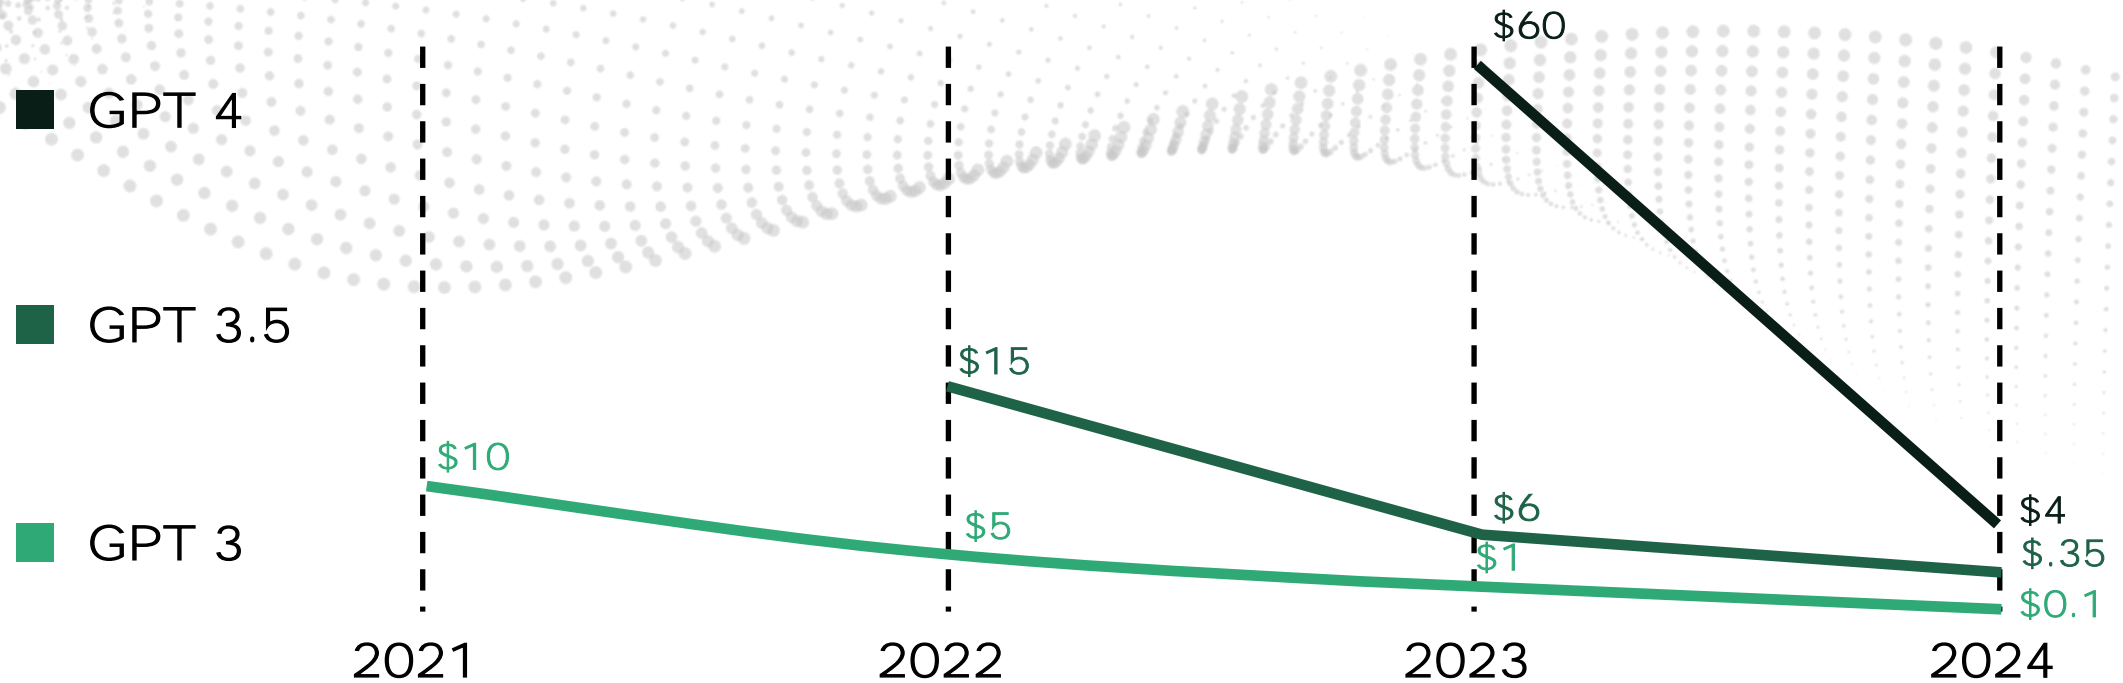

01

Where are we?

We are building machines
that possess human
intellectual equivalence.

Machine intelligence is getting *much* cheaper.

Price per million tokens

02

Where are
we going?

Integration Phases of the AI Revolution

PHASE 1
-2027

Enhanced
Applications

PHASE 2
2027-2035

Autonomous
Agents

PHASE 3
2035 - ?

Natural Language
Operating System

Everyone will soon have
access to **fully integrated,
unmetered intelligence.**

**In a world of unmetered
intelligence what separates
a human and a machine?**

A technological threshold asks
what can a machine do?

A societal threshold asks what
do we want a machine to do?

How and why does a societal threshold move?

We love control.

Technological thresholds are moving too quickly.

We have exceptional tolerance for human failure and none for machine failure.

How might the
AI REVOLUTION
complicate and compromise
our lives?

Idiocracy
Dehumanization
Job Displacement
Identity Displacement
Bad Acting

How might the
AI REVOLUTION
reduce suffering and
increase joy?

Expansion of Human Potential

Scientific Breakthroughs

Deflation

Time

03

How can you
prepare?

Prepare

for tremendous change.

Embrace
adaptability as a strategy.

Learn

how to learn.

Design
around the things
AI cannot do.

Optimize
for humanistic qualities.

Adaptability

Courage

Curiosity

Wisdom

Empathy

The future is great.

Optimism isn't naive.

THANK YOU
